

ZH/WF 97 Non Woven Fleece butyl tape

Non woven fleece backed single sided self adhesive butyl rubber tape is an exclusive laminate of Non woven fabric, rugged, cross-linked polymer films, and a thick layer of butyl rubber. The butyl compound adheres to most surfaces and seals around most punctures, forming a protective waterproof barrier. A high-quality release liner is applied to protect the adhesive surface until installation.

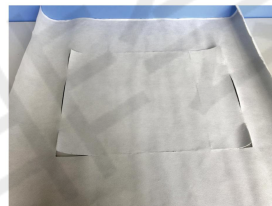

APPLICATION

Non woven-butyl is used in wet areas for waterproofing under tiles, especially in places where there are cracks, joints etc. It can be covered with tile adhesives or brush-able waterproofing materials.

FEATURES

- *Non woven is paint-able, compatible to coatings, paintings, adhesives, lime mortar, etc.
- *No melt in hot weather or harden in cold weather
- *Anti-UV and aging. Long service life
- *Eco-friendly, No toxic or odor.
- *High tack and good adhesion.
- *For roofing, waterproofing, patching and repair
- *Adheres directly to roof deck or substrate
- *Easy to install, low cost and labor saving

Model	97 Series
Aluminum layer	Sliver, white, blackish green, brick red
Butyl Rubber	Black, Grey, off-white
Roll Width	5cm, 10cm, 15cm, 20cm, max 100cm
Roll Length	5m, 10m, 15m, 20m, 30m
Thickness	0.5-1.5mm
Weight	1.7KG/m ² at 1.0mm
Packing	Shrink wrap+carton
Supply Model	Tape, Jumbo roll Membrane

We also supply module cutting sheet as per customer' s requirement. The module sheet is widely used as underlayment for where needs waterproof protection like wash room, floor drain, shower enclosure..ect.
